Safety Information

Read this entire manual carefully before you start using the device. This will take you a few minutes, but it will save you time later and will allow you to enjoy all the features on your device.

THIS MODEL MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a ‘hands-free’ device to keep the mobile phone away from the head and body.

Additional Information can be found on the website of the World Health Organization

How to handle and preserve your device

- Trying to modify, disassemble or repair the device or the charger yourself will make the warranty invalid.
- Avoid hitting or shaking your phone.
- The warranty of this phone may be annulled if you use unauthorised accessories. To prevent this from happening and to keep your phone working properly use only the battery charger and Micro USB cable that originally comes with the device.
- Make sure the device does not get wet. To avoid possible, short-circuit, electric shock or corrosion keep your phone away from rain, water splash, sweat or moisture. You must not use your device with your hands wet or immerse it in water. In case it gets wet keep the phone OFF and do not try to use a microwave to dry it.
- This product should not be used in extremely hot, cold, dusty or humid spaces. It also should not be exposed to long periods of sunshine or strong magnetic fields.
- Avoid all heat sources, ovens or other appliances (including amplifiers) that produce heat or have hot surfaces.
- Excessive high-volume levels or noise may affect your hearing. To prevent this from happening use an adequate volume in your earphones when you are listening to music or enjoying any of the multimedia features of the phone.
- You are fully responsible for keeping your information backed up and we don’t take any legal responsibility for data that is damaged or lost. It is possible to erase or interfere with the information stored in your phone by a magnetic device when using your phone. To avoid this from happening, keep your phone clear from magnetic devices.
• Pointing the torch into your own or another person’s eyes will cause damage and may result in blindness.

Safety Recommendations while using your device

AIRCRAFT

Switch off your wireless device whenever you are instructed to do so by airport or airline staff.

If your device offers a ‘flight mode’ or similar feature consult airline staff as to its use in flight.

DRIVING

Full attention should always be given to driving and local laws and regulations restricting the use of wireless devices while driving must be observed.

HOSPITALS

Mobile phones should be switched off wherever you are requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

PETROL STATIONS

Obey all posted signs with respect to the use of wireless devices or other radio equipment in locations with flammable material and chemicals. Switch off your wireless device whenever you are instructed to do so by authorized staff.

INTERFERENCE

Care must be taken when using the phone near personal medical devices, such as pacemakers and hearing aids.

For Pacemakers: Pacemaker manufacturers recommend that a minimum separation of 15cm be maintained between a mobile phone and a pacemaker to avoid potential interference with the pacemaker. To achieve this, use the phone on the opposite ear to your pacemaker and do not carry it in a breast pocket.

For Hearing Aids: Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

For other Medical Devices: Please consult your physician/doctor and the device manufacturer to determine if operation of your phone may interfere with the operation of your medical device.

Safety recommendations for accessories

• Use only Opel Mobile accessories or chargers that came with this phone

• Be careful when handling the battery. The lithium-ion battery can be put into use immediately after being unpacked. Use only the Opel Mobile battery that came with the
device. We recommend charging the battery as soon as possible once the phone has been switched on.

- Immediately stop using the battery charger if you smell an odour or overheats or a crack appears in the casing.
- In case you notice the cable, or the plug have suffered any damage, discontinue using it and contact sales support line as soon as possible for advice.
- The memory card should be protected from strong shocks and static electricity. Handle with care.

**Usage conditions and restrictions**

- All packaging materials, especially plastic ones, must be disposed of properly. The lack of this procedure may cause a suffocation danger to children. Any packaging must be kept out of children’s reach.
- This device is not a toy and not designed for children and strict adult supervision must always be adhered to. Keep the phone and accessories beyond children’s reach.
- This device can be recycled. To dispose of this device properly remember to follow local regulations. Local authorities may guide you on finding appropriate facilities to this end. The battery must never be disposed of in a fire.
- If this phone is lost or has been stolen please notify your network service provider as soon as possible and ask for the SIM card to be deactivated

You are fully responsible for any damage caused by not following these instructions or for improper use of the device. We do not accept any liability for any improper use or mishandling on this device.

Quick Setup Guide

Installing the SIM card

This phone requires a nano size SIM card which is the smallest of the 3 SIM cards available. If you don’t have a nano size SIM card, please contact your SIM card provider to receive a nano sized SIM card.

1. Remove the back cover, removing from the bottom left hand cornered edge then lifting off completely.

2. Remove the battery by lifting from the top first and pulling out
3. The SIM card tray is located in the lower middle of the phone, place your finger on the SIM tray cover and slide down to unlock. Carefully lift the SIM tray cover so to not bend or break the cover. Insert the nano sized SIM card, making sure the cornered edge of the SIM card is located in the top left corner and the gold plates are facing down on the gold plates of the SIM tray. Push the SIM tray cover back over the SIM card and slide up to lock it into place.

**IMPORTANT!**

Please ensure when lifting the SIM card-holder you do so carefully and please follow the instructions above. Following these instructions will help to ensure the SIM cardholder does not break.

**Installing T-FLASH memory card (Optional accessory not included)**

1. The T-Flash card (maximum 32GB) can be used as additional storage for photos, videos, music and more.
2. The TF-Card holder (maximum 32GB) is located to the left of the SIM card tray.
3. Insert the TF-Card (maximum 32GB) by inserting the gold plate first, ensure the gold plate is facing down onto the phone, then slide into place until it doesn't go in any further.

**Installing the battery**

1. Insert the battery by aligning the 3 gold plates on the battery with the 3 gold pins on the phone. Slide it in then push down to lock it into place
2. Put the cover back onto the phone, by aligning from the top first then clicking into place around the phone.

**Charging the Phone**
1. To charge your phone, insert the power adaptor into the wall.
2. Then insert the micro USB into the phones USB charging port
3. Turn the power on from the wall
4. We recommend charging the phones battery for at least 4 hours before your first use.
   *Please note, if your battery goes completely flat, you will need to charge the battery for at least 10 minutes before the phone will be able to be turned on.

**Turning the phone on and off**

1. To power on your phone, hold down the power/end call key for 3 seconds. The phone will then begin to turn on, this may take a few minutes to load.
2. To power off your phone, your phones keypad will need to be unlocked first. Hold down the power/end call key for 3 seconds. The phone will then power off.

**Unlocking/locking the keypad**

1. Your phone will automatically lock the keypad after 30 seconds of no usage.
2. To unlock the keypad, simply press the left menu key, then press the star key. The keypad will then unlock
3. To manually lock the keypad, press the left menu key, then press the star key. The keypad will then lock.
Keypad Functions (Predictive text)

This phone uses predictive text to help you type in names and words quicker and more easily. This function is available when adding new contacts and text messaging.

Typing words

1. When typing in words or names using the keypad simply press the letter on the keypad you wish to select.
2. For Example - you want to type “hello”
3. Click on 4GHI, 3DEF, 5JKL, 5JKL, 6MNO once.
4. The word ‘hello’ will appear. By pressing the “0” space key it will select the word that is highlighted or press the ok key to select that word.
5. There may be other words that match this selection. By pressing the left and right keys you can scroll through the list of words available, once the word is highlighted you can press the “0” space key to select that word or press the ok key to select that word.

Typing numbers

1. To type in numbers simply press the # hash key until the selection of 123 numbers appears in the top left-hand corner when typing messages or to the right when typing in new contacts.
2. Then using the keypad type in the numbers, you want to select.

Typing symbols

1. To type symbols like a dot or comma. Click the star key. This will bring up the menu to choose which symbol you wish to use. By using the cursor keys, you can scroll through the symbols available. Then press the left menu key or the ok key to choose the symbol you wish to use when highlighted.
2. If you don’t wish to use the predictive text feature, you can press the hash key until it selects the normal keypad function, which shows either ABC or abc. This will need to be done each time you wish to type a message.
3. To revert back to using predictive text, press the hash key until the symbol S-abc or S-ABC appears.
4. If you make a mistake and wish to delete letters, numbers or words, press the back key to clear.
Phonebook/Calls

Adding new contacts

(Please note: if you’re adding a contact to your SIM cards memory, adding photos and selecting ringtones are not possible, this feature is only available if adding contacts to the phones memory.)

1. Select menu using the left menu key or the ok key.
2. Using the cursor, scroll up to phonebook and select ok using the left menu key or the ok key.
3. Scroll up to add new contact and select using the ok key.
4. Choose to save to SIM or to the phones memory by pressing the ok key (If saving to SIM card you cannot add a photo or ringtone to this contact.
5. If saving to the SIM card, type in their name using the keypad, then scroll down to then enter their phone number using the keypad.
6. Once complete press the ok key to save that contact.
7. If saving to the phone’s memory, type in their name using the keypad, then scroll down to then enter their phone number using the keypad.
8. To save a photo to this contact scroll across using the cursor keys, you can use pre-saved images, or choose to take a photo or choose a photo from your already saved photos from the file. Select options using the left menu key then select your option using the ok key.
9. To choose a ring tone for this contact scroll across using the cursor keys, once you have selected the one you want, select the ok key save the contact.

Making a phone call using the phonebook

1. Click on the menu key then scroll to the phonebook folder and click ok on phonebook. Or alternatively you can click on the names shortcut key while in the main screen mode to open the phonebook.
2. Using the up/down keys scroll through your list of contacts.
3. Once you have highlighted the contact you wish to call, click on the answer/call key to dial that contact.

Making a phone call using the number keypad

1. Type the number you wish to call using the keypad.
2. Then press the enter or call key to dial that phone number.

Making a phone call using the 2-9 Speed dial keys

1. Using the keypad, hold down on the speed dial number contact you wish to call, the phone will then ring that contact.
Answering a phone call
1. To answer an incoming call, simply press the answer call key.

Rejecting a phone call
1. To reject an incoming call, simply press the end call/reject call key.

Activating Loudspeaker/Handsfree on calls
1. Whilst on a call simply click on H-free using the right back key to turn on handsfree loudspeaker.
2. To switch back to handheld/earpiece mode, simply click on earpiece using the right back key.

Adjusting speaker volume on calls
1. Whilst on an active call press the up and down keys to adjust the volume up or down.

Ending a phone call
1. To end a phone call, simply press the end call key.
Phonebook Settings

To access the phonebook settings, while in the phonebook press options using the options key. Then scroll down using the down key until Phonebook settings is highlighted then click select to open the phonebook settings menu.

Preferred storage

1. Selecting ok on preferred storage you can change the preferred storage of your contacts, simply press the up and down key to select your preferred storage and click ok to save.

Speed dial

1. To setup speed dial select ok on speed dial
2. Select ok on status to turn speed dial on or off
3. Then scroll down to set numbers to begin setting up your speed dial contacts
4. Highlight an empty speed dial number and select edit.
5. This will then open the phonebook, scroll up and down using the up and down keys to highlight the contact you wish to save to that speed dial number
6. Once highlighted, select ok and select yes to save or no if you wish not to save that contact
7. Follow the same process to set up speed dial on any other speed dial numbers you wish to set up

My number

1. Selecting ok on my number allows you to save and store your own number and details. Simply type in the details and follow the same process as adding a new contact

Memory status

1. Selecting ok on menu status will show you how much free space you have left to store contacts.

Copy contacts

1. Selecting ok on copy contacts allows you to copy contacts from SIM to phone or phone to SIM quickly and easily.
2. Simply choose SIM to phone or Phone to SIM then select ok
3. Using the up and down keys scroll through and select your contacts to copy over using the ok key.
4. Then select options and select copy marked to copy these contacts over.
Move contacts

1. Similar to copy contacts, this will allow you to move contacts from your SIM to phones or from your phone to SIM.

2. Follow the same process as copy contacts

Delete all contacts

1. Selecting ok on delete all contacts will allow you to delete all your contacts on your phone or on your SIM card

2. Press ok on From SIM or From Phone then enter the phones passcode to confirm the deletion. The default passcode is 0000

Call History

To access your call history, select menu then scroll up to calls and select ok, this will then open the calls folder.

Call History

1. Select ok on call history this will then open the call history menu.

**Connectivity** – within connectivity you can connect your device to other Bluetooth devices, play music or take calls via your cars Bluetooth. Press ok on Bluetooth, select power on to turn Bluetooth on. Then press ok on search an audio device to search for an available Bluetooth device. Ensure your other device is turned on. Then select pair to connect to that Bluetooth device.

**Restore factory settings** – Here you can restore your device to the original factory default settings. Please be aware if you restore to factory settings you will lose all data and information saved on this device. The default factory passcode is 0000.

Troubleshooting and Support

If you are experiencing difficulties with your mobile phone, please go through the following troubleshoots:

**The Mobile Phone will not power on**

1. Ensure the battery is inserted correctly
2. Ensure you are pressing and holding the power button for 5 seconds.
3. Ensure you have charged the phone for at least 10 minutes

**The phone is asking for a password on start-up**

1. The default password is 0000, you can change the password via steps outlined previously in security settings
The phone is asking for a PUK code

1. This means you have input the incorrect password 3 times or more. Contact your SIM Card provider to retrieve your PUK code to unlock your phone.

SIM card error or no SIM card

1. Ensure you have inserted the SIM card correctly and are using the correct size SIM card. Follow instructions previously stated for installing the SIM Card.
2. Your SIM card may be damaged or dirty, ensure you replace your SIM with your SIM Card provider if this error occurs.

Failure to connect to the network

1. Your network signal may be weak or out of range. Contact your SIM Card provider or try the phone in a different location to check your signal.
2. Your SIM card may be damaged, invalid or has no credit. Contact your SIM Card provider for support.

Failure to make an outgoing call

1. Ensure you have entered the correct phone number you wish to dial.
2. Ensure you have enough credit on your SIM Card account. Contact your provider for support.
3. Your signal strength may be weak. Check your signal strength and contact your SIM Card provider.

Cannot hear anyone on the call

1. Ensure your call volume is adjusted to your requirements. Using the up/down keys to adjust the volume while on calls. Or change via your user profile settings.
2. Ensure you have enough signal strength

Cannot receive calls

1. Ensure your mobile phone is switched on.
2. You have enough signal strength to receive calls.
3. Ensure you have not enabled call barring. You can find this under settings.
4. Ensure you do not have the phone in flight mode. See above for flight mode instructions.
5. Ensure your SIM card is installed correctly.

The other party cannot hear you on the call

1. Ensure your hand or fingers are not covering the Microphone.
2. Ensure you are speaking directly into the microphone.
3. Ensure the other party has their volume turn up to their desired level.
**Mobile Phone wont charge**

1. Ensure the power plug is inserted in the wall socket correctly and the wall switch is turned on.
2. Ensure the wall power socket is working by testing another device or a separate power socket.
3. Ensure you have inserted the micro USB cord into the phone correctly.
4. Ensure there is no dirt or dust accumulated in the phone's power socket.
5. Ensure you have left the phone on charge for at least 10 minutes as the battery may have run out of charge completely.

**Mobile phone won't connect via Bluetooth**

1. Ensure you have turned on and activated the Bluetooth setting. See previous/above instructions.
2. Ensure the other device has Bluetooth enabled.
3. Your Bluetooth device may be too far away from the other device to connect. Ensure you are within range of this device to connect.
4. Ensure you follow the Bluetooth instructions as stated previously above.
